

Weatherproof telephone ResistTel

Comfortable telephone for rough
environmental conditions

Overview

ResistTel stands for: telephony under rough environmental conditions with the highest degree of safety in industrial areas.

Our telephone is resistant to seawater as well as alkali, acids and lubricants. The housing made of special compression-moulded material is impact-resistant.

The V4A stainless steel keypad withstands high stresses and protects the inner parts of the telephone. The steel-armoured handset cord is designed for high tensile strain.

Its alphanumeric display allows for a clear reading. Moreover, the telephone offers all the amenities that are already supplied as standard in the office communication sector.

A number of accessories and components especially certified for potentially explosive areas even enhance the telephone's functionality.
